

Amenities

We have a “GREEN” products campaign. Our products are made from natural ingredients which are environmentally friendly and biodegradable. Our plastic Poly-Prop (PP) packaging has more elasticity which makes it easier to squeeze and best of all, it can be recyclable up to a third generation. We use vegetable ink on our labels and our boxes are all made out of recycled material.

We can customize and personalize all of our amenities by designing and producing any shaped bottle with any branding. For personalized branding, all we need is your logo.
